PREFACE

The staff of the Latin America Curriculum Project at The University of Texas has prepared this selected, annotated bibliography of written and audio-visual media for teachers, supervisors, and curriculum writers in the elementary school. A separate bibliography has been prepared for secondary school social studies personnel.

Most of the media cited in this booklet has been published or printed since 1960. A major exception is the fiction book category. Since, by their very nature, these works are less dated by the passage of time, fiction books published since 1950 are included.

The bibliography is divided into categories of media and, within each category, entries are designated as primary or intermediate, or as appropriate for a specific grade level. At the end of the bibliography a source list of names and addresses is given. Only those written materials which deal exclusively with Latin America or some part of it are included in this guide.

NOTE: The research reported herein was performed pursuant to a contract with the United States Department of Health, Education, and Welfare, Office of Education.
